DogWatch®

1 battery every 2 years*

& Other Brands
3 or 4 batteries per year

2 Years

← \$20

\$120 - \$160 →

6 Years

← \$60

\$360 - \$480 →

10 Years

← \$100

\$600 - \$800 →

DogWatch is SAFER for Your Pet (less chance he'll run out when the battery runs out.)

Fewer batteries is GOOD FOR THE ENVIRONMENT . . . and GREAT FOR YOUR WALLET!

- Fewer batteries = **less waste** and a greener, cleaner planet. And fewer batteries **saves you money**
- You can change the battery yourself. **No service call** required as with some brands.
- DogWatch products are **lead-free** and compliant with the Reduction of Hazardous Substances initiative (RoHS). Safe for your pet and safe for landfills.
- DogWatch uses a high efficiency 18 volt switching **Energy Star power supply** that complies with:
 - ❖ California Energy Commission specifications
 - ❖ Department of Energy requirements
 - ❖ Environmental Protection Agency Energy Star Standards
- DogWatch transmitters use only 9 watts of power - - the **lowest power consumption in the industry.**

* typical battery life and typical battery cost for R8 and R9 receiver models
